1 INTRODUCTION

The aim of this paper is to suggest and discuss possible research designs in order to evaluate the effects of phasing out the Danish PSO tariff on electricity consumption in the period 2017-2021.

2 BACKGROUND

2.1 2016 reform of the PSO tariff on electricity

2.2 Exports and electricity tariffs

2.3 Studies of price elasticity

2.4 Data on prices and companies

3 EMPIRICAL STRATEGY

3.1 Regression in Discontinuity

4 DISCUSSION

5 CONCLUSION
